EXPERIENCE (Last 7 of 24 total relevant years)

Minimally Self Employed — Anywhere, Earth

JULY 2019 - PRESENT

Consultant

- General light consulting with Wordpress and Drupal customization and client training. Setup, Themes, Plugins, etc.

Belle Tire — Allen Park, MI

OCTOBER 2017 - JUNE 2019

UI Architect, Developer, Remote Contract

- Assisted in the architecture and redesign of the corporate web site.
- Created online promotions and automated scheduling for display.
- Built a service checklist mobile app for use in branch locations.

RealGreen — Walled Lake, MI

APRIL 2015 - SEPTEMBER 2017

UI Architect, Agilist, Developer

- Provided web UI/UX architecture and development for a major 2 year revamp of Service Assistant (SA5) – a total business solution for the property services industry. Its predecessor was a legacy Windows application.
- Created a simplified UI framework for several other legacy WinForms apps. Allowed me to work on 3 total revamps with 3 back end developers simultaneously over the course of 1 month in a "war room" setting.

Latcha & Associates — Farmington Hills, MI

JUNE 2013 - MARCH 2015

UI Architect, Developer, On-Site Contract

- Built an internal stylized QR code generator allowing for unique and visually appealing QR codes for inclusion in automotive client brochures.
- Prototyped and developed "WhiteLabel", enabling clients to author or customize various formats of digital & print collateral for purchase. Among my proudest achievements, as I was able to develop an algorithm for generating PDFs containing variable length detailed lists of products resulting in a uniform appearance without failing into an infinite loop.
- Clients: Green Mountain, Bissell, BMW, Ford

SKILLS (Highly Abridged)

| **Core:** Extremely proficient with: HTML, CSS, JS, Standards, Devices, WCAG, W3C, Agile, REST
